NOV 27 2002
PATENT & TRADEMARKS

The inventions were stated to be distinct, each from the other, because, in the Examiner's view the method of the invention can be practiced by another materially different apparatus, such as the housing of the invention act as one of the electrodes. The applicants counter that the method Claim 19 does not exclude the housing from being an electrode, so that use of the housing as an electrode is not a materially different apparatus than is defined in the claims.

Applicants hereby elect to prosecute Group II, claims 19
36, and 41-44 with traverse.

Respectfully submitted,

Signature of Attorney
